Location: Karnataka, India

Professional Summary

Motivated and enthusiastic 2nd-year Computer Science Engineering student with a strong interest in Artificial Intelligence, Web Development, Open Source, UI/UX Design, and startup innovation. Skilled in HTML, CSS, JavaScript, Python, GitHub, Canva, Figma, and AI tools. Passionate about building practical projects, participating in hackathons, exploring emerging technologies, and continuously improving technical skills through real-world learning experiences.

Education

Shetty Institute of Technology

Bachelor of Engineering (B.E.) – Computer Science Engineering

Current Year: 2nd Year

Expected Graduation: 2028

Technical Skills

- HTML5 & CSS3
- JavaScript
- Python Programming
- Git & GitHub
- Canva & Figma
- AI Tools & Prompt Engineering
- UI/UX Basics
- Open Source Collaboration
- Problem Solving & Communication

Projects & Technical Work

Assistive Technology Research Project

Worked on accessibility-focused technology concepts aimed at improving usability for differently-abled individuals. Explored innovative solutions, research planning, and presentation development.

Ice Cream Meltdown Web Game

Built an interactive browser-based mini game using HTML, CSS, and JavaScript with countdown mechanics, responsive UI, and engaging gameplay features.

Portfolio & Resume Development

Developed and improved professional portfolio materials including LinkedIn optimization, GitHub profile enhancement, and ATS-friendly resume building.

Open Source & GitHub Learning

Actively exploring GitHub workflows, pull requests, collaboration practices, and open-source contribution opportunities through programs and technical communities.

Hackathons, Events & Community Participation

- Participated in startup and innovation ecosystem events in Kalaburagi.
- Explored hackathons, coding competitions, and internship opportunities.
- Attended entrepreneurship and startup networking sessions.
- Applied for open-source contribution programs like GSSoC.
- Interested in AI, startup ecosystems, and technology innovation.

Achievements & Learning

- Built strong foundational skills in frontend development and GitHub workflows.
- Continuously learning Artificial Intelligence and modern development tools.
- Developed practical understanding of collaboration and technical communication.
- Active learner in open-source and startup communities.

Interests

Artificial Intelligence, Open Source, Web Development, UI/UX Design, Startups, Innovation, Hackathons, Community Building

I hereby declare that the information provided above is true to the best of my knowledge and belief.
